Professional Summary

Accomplished and intelligent economist with a significant amount of expertise in education and healthcare. Possess in-depth knowledge of complex economic concepts, mathematics, and marketing, and adept at applying theories and ideas in real-world situations. Strong understanding of business finance, economic planning, and data interpretation. Excellent communication and interpersonal skills – able to work effectively alone or with others. Capable of using economic principles to predict market and consumer behaviour on both a long and short-term basis.

Work Experience

Junior Economist

Company Name

May 2014 – Present

- Help predict future market behavior by collecting vast amounts of client data and using basic economic calculations to better understand consumer habits.
- Provide executive partners with financial data monthly. Help partners understand key statistical findings.
- Use collected data to decide whether company should expand operations or reduce overall spending habits.
- Work with other economists and financial experts to learn about current domestic and global financial issues and how they impact the company at large.
- Use computer programs and other modeling tools to perform calculations and make data accessible to non-economists.

Economist

Company Name

November 2012 – March 2014

- Collected and analyzed vast amounts of insurance and financial data from accounting department. Used these findings to better understand the economic state of the company.
- Attempted to predict market behavior and its impact on the private healthcare sector on a quarterly basis.
- Advised chief executives on the buying and selling of company assets and stocks.
- Presented data findings and mathematical models to company heads. Helped forge plans for company financial growth and expansion.
- Assisted chief financial officer with establishing premium prices and tracking financial data throughout the company.

Economic Advisor

Company Name

January 2011 – October 2012

- Advised company owners prior to the sale or acquisition of company assets.
- Used data and models to better understand the company's financial health. Conveyed findings to company supervisors and executives.
- Maintained the order of important financial documents and backed up important information to software program.
- Statistically analyzed students and school behavior so administrators and company could improve classroom performance.

Education and Training

Master of Science in Economics – May 2009

University of California at City, State

Skills

- Ability to perform complex mathematical operations and model data
- Strong written and verbal communication skills
- Attention to detail
- Knowledge of most common economic and financial accounting software programs
- Capable of simplifying economic and mathematical data using modelling tools
- Fluent in English, Japanese, and Italian

Hobbies and Interests

I currently have a strong interest in science and technological developments. I keep abreast of the most important scientific discoveries, particularly in the field of astronomy, and I enjoy conversing about them. I am also fond of reading and art, and when I am not at work or studying for my PhD in Economics, I can be found reading a book (usually a mystery book). I also have a second-degree black belt in Karate.
